Shane Lopez

CS450

HW 3, Go Back N

Included files:

 client.cpp

 server.cpp

 450UtilsUDP.h

 CS450Header7.h

 makefile

 README.pdf

Building:

 $ make

Running:

 Server

  $ ./server [port number]

 Client

  $ ./client [server] [port] [filename]

Notes:

- Client and Server work much the same as they did in the previous assignment, with a few adjustments to conform to a Go Back N protocol.

- With certain files, the data is sent, but ACKS are not all received, resulting in a hanging client; I suspect this has to do with my timer settings and have been tweaking them for different results.
